Summary

I am a motivated and detail-oriented B.Tech student specializing in Artificial Intelligence & Machine Learning, with hands-on experience in frontend development, AI prompting, and real-world project execution. I have worked on responsive web applications, technical presentations, and creative digital content projects that strengthened my problem-solving and development skills. Along with certifications and internship experience in technology-focused domains, I have also developed strong leadership and communication abilities through event management and collaborative projects. I am passionate about innovation, continuous learning, and building impactful technology solutions that combine creativity with practical implementation.

Education

CMR College of Engineering & Technology
B.Tech in Computer Science & Engineering(Ai&ML)

Hyderabad,Telangana
September 2024 – March 2028

Narayana Junior College, Koheda
Intermediate (MPC)

Hyderabad,Telangana
September 2022 – March 2024

Technical Skills

Languages: Python, Java, JavaScript, HTML, CSS, SQL, C

Web

Development: React.js, Responsive Web Design, Frontend Development, REST API Integration

AI &

Emerging Technologies : Artificial Intelligence, Machine Learning Basics, AI Prompt Engineering, Generative AI Tools

Tools & Platforms: Git, GitHub, VS Code, Canva, Postman, PowerPoint

Databases: SQLite, MySQL

Core Concepts: Data Structures, Algorithms, Operating Systems, Computer Networks, Database Management

Projects

SAMVAAD AI — Multilingual AI-Based Helpline System

2026

- Built an AI-powered multilingual helpline system enabling users to report issues through voice or text communication in their preferred language.
- Designed the system to analyze complaints, identify relevant departments, and generate real-time assistance responses automatically.
- Worked on AI-driven communication workflows, user interaction design, and collaborative project development using modern technology tools.

AI Plant Classifier

2025

- Developed a machine learning-based plant classification application capable of predicting plant categories using leaf measurements and input parameters.
- Created an interactive desktop interface for prediction and result visualization while implementing classification logic using Python.
- Strengthened understanding of machine learning fundamentals, data handling, model prediction workflows, and GUI-based application development.

Smart Accident Detection & Hospital Recommendation System

2025

- Designed and developed an AI-assisted accident detection system capable of analyzing accident-related inputs and recommending nearby hospitals for emergency response.
- Implemented location-based features, image upload functionality, and an interactive user interface focused on accessibility and rapid assistance.
- Enhanced practical skills in frontend development, AI integration concepts, responsive UI design, and real-world problem-solving using technology.

Digital Banking Management Solution

2025

- Developed a DBMS-based banking management system using SQL concepts to manage customer accounts, transactions, balance records, and secure financial data storage.
- Implemented modules for transaction management, account handling, and backend database operations with a structured relational database design.
- Gained hands-on experience in database normalization, ER modeling, SQL queries, and secure data management practices for real-world banking operations.

VAHANAVEDHIKA — Smart Transportation Safety & Monitoring System

2025

- Designed and developed a smart transportation safety and vehicle monitoring system aimed at improving institutional transport management and passenger safety.
- Focused on real-time tracking, automation, and efficient monitoring features to address real-world transportation challenges.
- Collaborated on project planning, system workflow design, and problem-solving strategies while enhancing project management and technical documentation skills.

Certifications

- **Google Certifications** — Google AI Essentials, Discover the Art of Prompting, Maximize Productivity With AI Tools & Use AI Responsibly | Google, 2026
- **Cisco Networking Academy** — Introduction to Modern AI, Introduction to Data Science, Introduction to Cybersecurity & Introduction to IoT and Digital Transformation | 2026
- **Salesforce Certified Agentforce Specialist** | Salesforce, 2025
- **Prakalp Pradarshan Project Participation Certificate** — VAHANAVEDHIKA | CMR College of Engineering & Technology, 2025

Achievements & Activities

- Presented “VAHANAVEDHIKA” at Prakalp Pradarshan — Inter Project Competition conducted by CMR College of Engineering & Technology, 2025
- Earned Salesforce Certified Agentforce Specialist certification demonstrating knowledge in AI-powered CRM and automation technologies, 2025
- Completed multiple industry-recognized certifications from Google and Cisco Networking Academy in Artificial Intelligence, Prompt Engineering, Cybersecurity, Data Science, and IoT technologies, 2025–2026
- Led and managed technical and cultural event activities as Event Manager for the Annual Day at CMR College of Engineering & Technology
- Developed multiple real-world AI and software projects including SAMVAAD AI, Smart Accident Detection System, AI Plant Classifier, and Digital Banking Management Solution during academic learning and practical implementation experiences
